A friend of a friend sent this info. Please pass it on to anyone you think might be interested.

I "have" 5 Culver Cadet aircraft all in pieces that I may have "accidentally" bought or that can be had for free . . . They were/are owned by Ken Kinsler out of Sand Springs.

Ken is getting old and cleaning things out. I am just trying to help him get this stuff moved. He was very passionate about his stuff.

Do you know of a good home for this Culver collection? Maybe a restoration shop or a museum . . .

One of these Culvers was recently flying but got landed wheels up.

One of the tail numbers is N44520. Others are projects, all registered. He has paperwork and all that available

He also has a Chief airframe, engine, etc. The Chief is sold but I think that deal will fall through. The Chief "needs everything."
